

Automatic filler with stainless steel lid and tray, 6 nozzle

Ref: FAT043

Has 6 nozzles. Photo is for illustrative purposes only.
Available 1 to 2 weeks after payment.

Available 1 to 2 weeks after payment.

HAS 6 NOZZLES - PHOTO IS FOR ILLUSTRATION PURPOSES ONLY

Technical Specifications: Tank, lid, tray, legs, and other small parts in stainless steel AISI 304

Float

Adapter and curve in PP

Valve inlets in PLD

Valves and pistons in stainless steel AISI 303

Screws in stainless steel AISI 304

Leg wedges in PVC

Float Regulator: Used to regulate the liquid level inside the tank.

Operates on the communicating vessels system.

To start filling, draw the liquid with a 25 cm plastic tube, in each nozzle, to remove the air, until the liquid comes out through the nozzles. The liquid to be filled should be taken from the top of the tank; if done from the bottom, it may happen that the pressure exerted on the float is not enough to close the liquid inlet valve to the tank. Clean with clean water, dry before and after each use, and store it on wood, plastic, or felt to prevent rusting.
