

Lusit/rever hive stand – plastic varroa trap

Ref: EST003

Sanitary bottom board for Lusitano/Reversible model.

□The sanitary bottom board helps in the fight against varroa, as they fall onto the tray through the holes in the bottom board and can no longer return to the hive.□The aforementioned tray is removable, allowing not only for its cleaning but also for counting varroas, providing an idea of the infestation status of the hive to plan necessary treatments.□In the summer, the tray can be removed for better ventilation in the hive.
