

### Dana Matic 1000 SW Dosing Machine (110040)

Ref: UTD011

This machine consists of a gear pump manufactured by Swienty, made of food-grade plastic, and a precise dosing electronic part from Swienty to control the pump. It ensures powerful filling and drip-free function.

The filling weight is digitally displayed and can be set for quantities from 20g to 10kg or 0.1 to 100 ounces. The machine is easily calibrated to ensure accurate filling. Up to 20 different standard filling programs can be stored, containing weight, anti-drip setting, speed, calibration factor, and other filling parameters. Max. temperature for the liquid: 60-65 °C. If the machine is supported on the stand, it fills bottles from 10mm to 105mm in height.

Technical data:

Machine type:

Computer-controlled gear pump

Filling range: from 20g / oz / ml

Pump capacity: approx. 300 kg / h (hot honey)

Filling capacity: approximately 200 kg / h

Accuracy: +/- 1% Power: 100-260V / 50-60Hz

Power consumption: 230V

Dimensions: 22x31.5x18 cm

Connections: 1 1/2 "BS - 1 1/2" hose

Price:

**€ 3.28**

Beekeeping, Filling
