

### DAM 1000 filling station with Ø45 table

Ref: UTD029

With this Dana Api Matic filling station (SW - 110890EU), your filling process becomes much easier.

You just need to place the empty bottles on the table and take out the filled bottles from it. You can fill up to 200 kg per hour, in bottles ranging from 10g to over 1kg.

The machine is simply plugged into a 100-250V socket and connected to the honey container.
