

Multi-jet Bottle Washer - 35cm Lance

Ref: FAT178

Available 1 to 2 weeks after payment.

Available 1 to 2 weeks after payment.

It is used to wash bottles, carboys, barrels, and other containers with narrow mouths, due to the reach of the jets, which reach places where no bottle washer reaches.

It has front jets that clean the bottom of the container and rear jets that, in addition to washing, facilitate the removal of residues.

By replacing the lances, it can wash larger containers.

If the tap is connected to a boiler, it can be used with hot water, up to 65°C, increasing the effectiveness of the washing.

You can find lances of different sizes at:

35cm Bottle Lance

45cm Bottle Lance
