

Neo-Nosapiol – Nosema

Ref: TRA018

It is a food recommended to stimulate the intestinal defenses of bees and prevent intestinal disorders. These changes mainly occur in Spring and Autumn when humidity is high.

Usage:

Mix 100 grams of sugar per jar, once mixed, spray the frames with bees, especially on the frames with brood. It can also be used to enrich the liquid food used in bee feeding by placing the contents of the jar in 25 liters of food.
